DETAILED ACTION

Page 2

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 5, 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dryon.

Regarding claims 5 and 9, Dryon teaches a method for separating a pane of a brittle material from a moving sheet of material comprising the steps of:

- releasably engaging the moving sheet within an area defined by the to-beseparated-pane (belts 8, 9);
- (b) rotating the to-be-separated-pane about an axis which substantially coincides with the separation line (at the location where belt assembly 4 and 7 meet); and
- (c) moving the separated pane relative to the moving sheet by using spring force (spring 32 pulls the pane 37 down from an inclined surface to a horizontal surface).

Regarding claim 6, gravity force plays a part of pulling the pane 37 down from an inclined surface to a horizontal surface.

Allowable Subject Matter

3. Claims 1-4, 8, and 10-15 are allowed.

Application/Control Number: 10/657,659 Page 3

Art Unit: 3724

4. Claims 7 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
